Reasons for Allowance

1. The following is an examiner's statement of reasons for allowance:

The closest prior art of record is US Patent No. 5903878 to Talati et al.

Talati et al. disclose a method and apparatus for electronic commerce. In Talati et al.'s system an electronic commerce transaction occurs between a client, merchant and a CA utilizing an e-mail control system (ECS) to enable confirmation of the validity of the transaction. Talati et al. taken either individual or in combination with other prior art of record fails to teach or suggest providing, by the first party to the second party, contact information of a third party service provider associated with the first party and contacting, by the second party, the third party service provider to obtain a location of a predetermined, private mailbox associated with the first party, wherein information regarding the private mailbox is not communicated to the second party during the electronic transaction as recited in independent claim 1 and providing, by the first party to the second party, contact information of a third party service provider associated with the first party and providing, by the second party to the third-party service provider, a request for confirmation of the electronic transaction, wherein information regarding the private mailbox is not communicated to the second party during the electronic transaction as recited in independent claim 18.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- “Beyond announces most advanced remote e-mail solution; Beyondmail 2.0 remote is key component of re-engineering toolkit” discloses an agent mailbox that automatically queries corporate database and sends the information to the remote user. Also, the agent mailbox verifies inventory levels and sends an order confirmation to the customer via e-mail.
- European Patent No. 1085436A2 discloses an e-mail system.
- US Publication No. 2001/0029496 to Otto et al. discloses a system and method for providing anonymous financial transactions. In Otto et al.’s system, a client connects to the network via a proxy server to anonymously browse and purchase items from a website.
- US Publication No. 2003/0069857 to Junda discloses a proxy system for customer confidentiality. Junda teaches a system and method that enables customers to purchase goods or services from a merchant without revealing selected real user data to the merchant.
